

## **FINISH BORING KIT PROMOTION**

Swiss Tool Systems AG (Bürglen, Switzerland) and ERI America are proud to announce their agreement for ERI America to become the exclusive North American distributor for Swiss Tool's Swiss Bore & Swiss Flex lines, as well as their KM, Capto & HSK turning tools. Swiss Tool, founded in 1973, has grown to become one of Europe's top manufacturers of precision tooling. Swiss Tools is famous for their top quality, accuracy, and their pure steel look. They are uniquely positioned as a manufacturer of all known interfaces in the world of modular boring. In order to introduce Swiss Tools boring tools to the North American market we are offering all finish boring kits at special introductory prices for a limited time. (See reverse side for kit details)

785.063.010.030 Kit  
(HSK63A Ø0.384 - 1.185")

All kits include a finish boring head with inner coolant supply, coolant through boring indexable bars which accept ISO standard inserts, dial precision of 0.0002" on radius, and specially designed diametrical adjustment which nearly eliminates all backlash.
